 Sorting from less important to the most important:
 3. More clothes
 I'm on a male side but it benefits both sides just as well. I still feel like some stuff is missing since ages and whenever something comes into the game it's just out of no where with the only exception of last couple of sets where you added police outfits, sets of bras etc.
 My take would be to aim for casual stuff as I'm waiting for some track-suit that I could hang around roaming the world 3dxchat constatly bored...
 2. More more avatar customization
 I know it is a big one but I would love to see more diffrnces sticking out rather than a skin colour that everyone pays so much attention to causing in-game racism. I would like to see heigh diffrnces going on. Not to extreme, just slightest... and maybe some wider booty
 1. MORE POSES!
 That's the only thing that get us, players back and together and keeps up hyped up about new things that we don't care about.

 I would kinda like to see some expirience/level up system going on when it comes to fucking, which could be attached to the poses but then again... We would need a lot more poses to work it on

255,032,413	The ability for playerbase to have active input in creating poses and clothes and their variations would make this game seriously blow up with new content, if those things were implemented it would be a HUGE gamechanger :) I'm sure a ton of new people would join, and old playerbase would be very happy.	Thursday, Sep 23rd 11:28AM

254,999,733	I've said it before (in forums and email) and I'll say it again here. I honestly think you guys should lean more heavily into letting users customize clothes/skins/tattoo's/hair/items/poses etc. You can Unity as per the Tattoo contest, let players Submit their items (Maybe as well as a picture in a public forum thread so people can like or dislike it, show player input) and then you only need to have someone (Lisa?) Check to make sure its not copyrighted or against ToS. You could easily start adding 6+ Items a month with minimal work on your end, make your player base stoked with the new options, and give us all "more" to work with! P.S. Please make Tattoo selection 'changeable' by region. one day? I've loved some of the arm tattoo's in one tattoo mesh and a leg tattoo in another. Being able to cycle tattoo's based on Torso 1, Torso 2, Left Leg etc seems more interesting then a full skin and transparency parts of it!	Wednesday, Sep 22nd 4:12PM
254,992,051	better ignore system, when ignore work on all unwanted account	Wednesday, Sep 22nd 2:38PM
