I truly believe that People Come here for the sex but they stay for the social connexions they made so please, PLEASE, give us stuff to do with our friends and lovers outside the sex. We're often bored when we dont do sex. Poker, playing pool, darts, send a ball in a basket, grab stuffed animals in a machine of funfair, beer pong, throw stuff, anything that can be fun and transformed as other games or challenges by the creativity of players. More funny poses, social poses, to laugh and connect even more and stay on the game.

The feature most people I talk to gripe about is that there is no "breast play" in sex poses. There are no poses for that and I hear complaints about that all the time.

- More objects in the world editor would considerably lighten the constructions. (cars, home objects, outdoor objects, office objects, bars/clubs, etc), being able to change their colors.
    - The possibility to have an opacity slider for the elements (transparent to opaque) would allow to create objects like curtains a little bit transparent etc
    - Some chairs (like the Eams, or the blue chair) have interesting poses. They should be available as free poses, so that they can be put on other created chairs.
    - be able to import JPEG or PNG images in order to make paintings, frames with photos etc
    - More clothes for male avatars. A tuxedo and some socks would be nice.

A suit and tie would be great.

The possibility to have hair on other parts of the body (chest, forearms, legs. Not all men are beardless and hair is not dirty).

	I happen to love the latest update however the head sets and purses cannot be removed with out going to the editor to do so unlike our clothes so many are not even using them but really want to also most ppl including myself would of loved more hair and the ability to use old and new fashion with the new textures also more clothes in general fashion is one reason why ladies even log in most of us any way thank you . 	Allow host to switch between preset lighting states. (Change red stage lighting to blue stage lighting to solo spotlight, etc.) Add tempo/bpm/speed slider to dance animations. (Same function as sex poses would be good enough.) Give fireworks extra charges, so the host has more control over their timings. Allow avatars to stand at least a little bit closer to each other. Slight clipping is better than an invisible forcefield. Co-op build mode would be incredible. I would spend hours building with my partner.	Monday, Oct 3rd 5:10f
268,070,037		
	We need more fantasy stuff like elf ears, vampire fangs, werewolf etc	Monday, Oct 3rd 3:10f

	- What is missing is the correct order of the layers of clothing. For example, bodysuits should be in a layer of underwear rather than dresses. - And also that one layer of clothing does not exclude another, as in the case of the open jacket. - It is also annoying that in some sex positions the bottom part of the clothing is automatically removed, although this is not necessary. For example, the blowjob pose. It would be better if clothes could be taken off and put on in any position and control it yourself.	Sunday, Oct 2nd 1:50f

 268,030,479	<p>I would really like some Minigames mainly, u can do some stuff with the Room Editor and make up some games but a supported minigames would be cool. Either some sex games or normal games - - biliard, cards, boardgames etc.</p>	Sunday, Oct 2nd 2:0
 268,022,626	<p>New tits fuck poses, like a boobsjob + sucking. Also changing the speed, a cumming animation like that too</p>	Sunday, Oct 2nd 5:1
 268,004,026	<p>There are more bars playing country western music. Would be nice to have clothing to dress for those places.</p>	Saturday, Oct 1st 12
 268,003,749	<p>could you put a short and curly hair, bob style, please and more dances, but of those that do not deform the avatar's body</p>	Saturday, Oct 1st 12
 268,002,761	<p>Body Hair for male avatars - it's ridiculous it has never been in the game. At least chest hair if not arms, legs and butt as well. Soft cock option is also very needed and should be a priority in my opinion as it would make the most amount of players happy. Also a cock size slider option in the character editor same as female breasts so when walking around it is different to other cocks as in real life, it doesn't have to stay the same size when in a sex pose if this ruins the animation, all cocks could be the same size when having sex in an animation, but could be different when walking around, that's when it's important. And yes, soft, same as when u take a piss using the toilet prop. It is possible, the model is already in the game, please add it ASAP. Also the option to be able to add custom textures to objects in the world builder is needed. Another game uses a system where you have the image file (jpg/png etc) uploaded to an external image hoster and when editing the room, the objects have a field in the item to put the url for that image. When the room loads it grabs the image using the url and adds it to the prop before anyone comes in and sees it. You could do the same thing, if you didn't want to be using external urls, you could give all players space for their own images, the file size could be limited and specified to keep storage space down, and you could limit the library to 100 images or whatever. Then the game could grab the custom image when the room loads, if the other players have the normal textures saves on their own computer then it could be saved at the time they use it. I don't know how it works at the moment really, I only know that we need custom textures. One last thing, when there is server maintenance, unless someone is on discord or forums they have no idea it is happening. Many people are in the middle of sex when this happens. Another game I used to play has a server reset once a week and they make a point of making an announcement in what is their equivalent of World Chat. They announce it several times, 30 minutes before, 20 minutes, 10 minutes, 5 minutes and 1 minute as far as I can remember. This gives people several chances to realize the server is closing down and to organize themselves for it, and it is something I would like to see happen in 3DX when there is a server disruption happening, given that people get so upset when they finally find someone to have sex with and then have it disconnect midway and they can't contact that person again because they never added them as a friend first. The consequences of a server disconnect in 3DX are quite large compared to other places so it would be good to have some kind of announcements so the community is aware it is going to happen and can prepare accordingly. It's all about making the experience as smooth and easy as possible for your players.</p>	Saturday, Oct 1st 10:30AM

 267,993,269	<p>I personally would love to have more options for clothed sex. (Example: Thongs/Underwear moved to the side, skirts lifted/raised up, jeans/pants pulled down, Leggings ripped open, etc...)</p> <p>For poses, I'd love to see foursome poses (Gangbangs/blowbangs/bukkake to be specific). More Threesome options would be nice too (Especially a MMF pose where the F is giving blowjobs to both MM).</p> <p>As for clothing, I'd love to see more options like Leggings/Yoga pants options, Higher waisted jean shorts, gym/workout shorts, more skirt/miniskirts, more fishnet/stockings options, visible thongs on the waist when wearing shorts/pants/skirts, and sheer/see-through shirts/tops.</p> <p>Minigames could also work along with sex poses. If you added the game "Pool", people could do strip bets/sex bets for winning/losing, which in turn would lead to add Pool table poses, and what not. Could even make gloryhole related minigames, beer pong, etc... Minigames have a lot of potential!</p>	Friday, Sep 30th 7:2'
