

Other Response
jittering since update
Constant disconnects of streaming music
disconnection to lovense
All of the above
music connection
sound server issues
Every time I enter in a room, I see almost half of the avatars below floor or ground until they move their avatars. There is problem in profile loading too. Sometimes profile button doesn't work or load very slow.
ALL OF THEM. LITERALLY ALL OF THEM.
DJ music stream instability. Streams drop a lot since the last update
Provide better (realistic) first person POV for sex poses, sitting, walking, turning head left and right
Avatars is like frozen, for example someone walk and at my screen his/her avatar collidate at the wall and continue walk into wall. Person avatar is not to the wall at all and don't walk into that wall. Same with jumps into the water (usually at the yacht), dance and so on. When i reload room all is back to normal and i see correct postion of avatar.
Chat buged
Ejaculation penetrates the body.
sometimes get a bug where i am unable to look at user profiles until i reset the game.
Your position in-game is not the same as seen by third parties.
